

**United Gulf Bank B.S.C. (c)**

**CONSOLIDATED FINANCIAL STATEMENTS**

**31 DECEMBER 2020**

## **United Gulf Bank B.S.C. (c)**

### **REPORT OF THE BOARD OF DIRECTORS**

The Board of Directors is pleased to submit its report and the audited consolidated financial statements of United Gulf Bank B.S.C. (c) ("the Bank" or "UGB") for the year ended 31 December 2020.

#### **Principal activities and review of business developments**

The principal activities of the Bank and its subsidiaries (together the "Group") comprise of investment and commercial banking. Investment banking include asset portfolio management, corporate finance, advisory, investment in quoted and private equity / funds, real estate, capital markets, international banking and treasury functions. Commercial banking includes extending loans and other credit facilities, accepting deposits and current accounts from corporate and institutional customers.

#### **Results for the year**

For the year ended 31 December 2020, the Bank recorded a net loss of US\$ 19.5 million (2019: net profit of US\$ 11.4 million) and total operating income of US\$ 55.5 million (2019: US\$ 113.7 million). This is mainly attributable to the outbreak of the coronavirus (COVID-19) and its effects on the global and regional economies.

As of 31 December 2020, total assets of the Group were US\$ 746.5 million (2019: US\$ 923.2 million) with total equity of shareholders at US\$ 181.2 million (2019: US\$ 210.9 million).

#### **Appropriations for the year**

The Board of Directors recommend that no allocation be done from retained earnings to reserves as the Bank recorded losses during the year ended 31 December 2020.

#### **Auditors**

Ernst & Young have expressed their willingness to continue in office and a resolution for their appointment as auditors of the Bank for the year ending 31 December 2021 has been put for approval by the Shareholders.

Signed on behalf of the Board of Directors

Masaud Hayat  
Chairman

## INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF UNITED GULF BANK B.S.C. (c)

### Report on the Audit of the Consolidated Financial Statements

#### *Opinion*

We have audited the accompanying consolidated financial statements of United Gulf Bank B.S.C. (c) ("the Bank") and its subsidiaries (together "the Group"), which comprise the consolidated statement of financial position as at 31 December 2020, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of cash flows and consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2020, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as modified by the Central Bank of Bahrain ("IFRS as modified by the CBB").

#### *Basis for opinion*

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Kingdom of Bahrain, and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Other information included in the Group's 2020 annual report*

Other information consists of the information included in the Group's 2020 Annual Report, other than the consolidated financial statements and our auditor's report thereon. The Board of Directors is responsible for the other information. Prior to the date of this auditors' report, we obtained the Report of the Board of Directors which forms part of the annual report, and the remaining sections of the annual report are expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of the auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF UNITED GULF BANK B.S.C. (c) (continued)

### Report on the Audit of the Consolidated Financial Statements (continued)

#### *Responsibilities of the Board of Directors for the consolidated financial statements*

The Board of Directors is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs as modified by the CBB, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

#### *Auditor's responsibilities for the audit of the consolidated financial statements*

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

## INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF UNITED GULF BANK B.S.C. (c) (continued)

### Report on the Audit of the Consolidated Financial Statements (continued)

#### *Auditor's responsibilities for the audit of the consolidated financial statements (continued)*

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the audit committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF UNITED GULF BANK B.S.C. (c) (continued)**

### **Report on Other Legal and Regulatory Requirements**

As required by the Bahrain Commercial Companies Law and volume 1 of the Central Bank of Bahrain (CBB) Rule Book, we report that:

- a) the Bank has maintained proper accounting records and the consolidated financial statements are in agreement therewith;
- b) the financial information contained in the Report of the Board of Directors is consistent with the consolidated financial statements;
- c) we are not aware of any violations of the Bahrain Commercial Companies Law, the CBB and Financial Institutions Law, the CBB Rule Book (Volume 1 and applicable provisions of Volume 6) and CBB directives, or the terms of the Bank's memorandum and articles of association during the year ended 31 December 2020 that might have had a material adverse effect on the business of the Bank or on its consolidated financial position; and
- d) satisfactory explanations and information have been provided to us by management in response to all our requests.

## 1 INCORPORATION AND PRINCIPAL ACTIVITIES

### **Incorporation**

United Gulf Bank B.S.C. (c) ("UGB" or "the Bank") is a closed joint stock company incorporated in the Kingdom of Bahrain in 1980, under Commercial Registration number 10550. The address of the Bank's registered office is UGB Tower, Diplomatic Area, P.O. Box 5964, Manama, Kingdom of Bahrain.

The Bank operates in the Kingdom of Bahrain under a Wholesale Banking License issued by the Central Bank of Bahrain ("the CBB").

### **Activities**

The principal activities of the Bank and its subsidiaries (together the "Group") comprise of investment and commercial banking. Investment banking include asset portfolio management, corporate finance, advisory, investment in quoted and private equity / funds, real estate, capital markets, international banking and treasury functions. Commercial banking includes extending loans and other credit facilities, accepting deposits and current accounts from corporate and institutional customers.

The Bank's parent company is United Gulf Holding Company B.S.C. ("UGH") which owns 100% shares of the Bank and ultimate holding company is Kuwait Projects Company (Holding) K.S.C. ("KIPCO"). UGH is incorporated in the Kingdom of Bahrain as a joint stock company and is listed on the Bahrain Bourse. KIPCO is incorporated in the State of Kuwait and is listed on the Kuwait Stock Exchange (Boursa Kuwait).

### *Impact of COVID-19*

During the year ended 31 December 2020, there was an outbreak of coronavirus (COVID-19). The existing and anticipated effects of the outbreak on the global economy is expected to continue to evolve. While these developments continue to impact the Group's operations, the scale and duration of further developments remain uncertain at this stage and could potentially further impact the Group's financial position, financial performance and cash flows in the future, the extent of which is presently undeterminable.

These consolidated financial statements were authorised for issue by the Board of Directors on 28 February 2021.

## 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

### **Statement of compliance**

The consolidated financial statements of the Group have been prepared in accordance with the relevant provisions of the Bahrain Commercial Companies Law, directives and regulations and associated resolutions, rules and procedures of the Central Bank of Bahrain (CBB). These require the preparation of financial statements under International Financial Reporting Standards ("IFRS"). These include the recently issued CBB circulars on regulatory concessionary measures in response to COVID-19. These rules and regulations, in particular CBB circular OG/226/2020 dated 21 June 2020 and related CBB communications, require the adoption of all International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), except for:

- (a) recognition of modification losses on financial assets arising from payment holidays provided to customers impacted by COVID-19 without charging additional interest, in equity instead of profit or loss as required by IFRS 9 'Financial Instruments'. Any other modification gain or loss on financial assets are recognised in accordance with the requirements of IFRS 9. During the year ended 31 December 2020, no modification losses were recorded by the Group; and
- (b) recognition of financial assistance received from the government and / or regulators in response to its COVID-19 support measures that meets the government grant requirement, in equity instead of profit or loss. This will only be to the extent of any modification loss recorded in equity as a result of (a) above, and the balance amount to be recognised in profit or loss. Any other financial assistance is recognised in accordance with the requirements of IAS 20 'Accounting for Government Grants and Disclosure of Government Assistance'. Government assistance amounting to US\$ 1,227 thousand is recorded in profit or loss during the year ended 31 December 2020 as the Group had no modification losses to be recorded in equity. The amount was recorded as a deduction from related expenses in the consolidated statement of income.

The above framework for basis of preparation of the consolidated financial statements is hereinafter referred to as 'IFRS as modified by CBB', which has been applied retrospectively and did not result in any change to the financial information reported for the comparative period.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Statement of compliance (continued)**

For the purpose of these consolidated financial statements, the financial information of the subsidiaries has been adjusted to align with the above framework.

**Basis of preparation**

The consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments, investment properties and financial assets designated at fair value through profit or loss (FVTPL) and financial instruments at fair value through other comprehensive income (FVOCI) all of which have been measured at fair value.

Certain of the prior year figures have been reclassified to conform to the presentation adopted in the current year. Such reclassification did not affect the previously reported net profit or the total equity of the Group.

**Presentation and functional currency**

The consolidated financial statements have been presented in United States Dollar (US\$) which is also the functional currency of the Bank and are rounded to the nearest US\$ thousands except when otherwise indicated.

**New and amended standards and interpretations adopted in the current year**

The accounting policies used in the preparation of these consolidated financial statements are consistent with those used in previous year, except for the adoption of the following new and amended standards and interpretation existing standards applicable to the Group, and which are effective for annual periods beginning on or after 1 January 2020:

*Amendments to IFRS 3: Definition of a Business*

The amendment to IFRS 3 Business Combinations clarifies that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that, together, significantly contribute to the ability to create output. Furthermore, it clarifies that a business can exist without including all of the inputs and processes needed to create outputs. These amendments had no impact on the consolidated financial statements of the Group, but may impact future periods should the Group enter into any business combinations.

*Interest Rate Benchmark Reform: Amendments to IFRS 9, IAS 39 and IFRS 7 (IBOR reform phase 1)*

IBOR reform phase 1 includes a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument. As a result of interest rate benchmark reform, there may be uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument during the period before the replacement of an existing interest rate benchmark with an alternative nearly risk-free interest rate (an RFR). This may lead to uncertainty whether an economic relationship exists and whether prospectively the hedging relationship is expected to be effective.

The Group applied the IBOR reform phase 1 amendments retrospectively to hedging relationships that existed at 1 January 2020 or were designated thereafter and that are directly affected by interest rate benchmark reform. The Group has not yet converted its hedging instruments from LIBOR to an alternate benchmark rates as of the reporting date.

*Amendments to IAS 1 and IAS 8: Definition of Material*

The amendments provide a new definition of material that states, "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

The amendments to the definition of material did not have an impact on the Group's consolidated financial statements.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**New and amended standards and interpretations adopted in the current year (continued)**

***Conceptual Framework for Financial Reporting issued on 29 March 2018***

The Conceptual Framework is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the IASB in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards. This will affect those entities which developed their accounting policies based on the Conceptual Framework. The revised Conceptual Framework includes some new concepts, updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts.

The amendments did not have an impact on the Group's consolidated financial statements.

***Amendments to IFRS 16 Covid-19 Related Rent Concessions***

On 28 May 2020, the IASB issued COVID-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the COVID-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a COVID-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification. The amendments did not have an impact on the Group's consolidated financial statements.

**Principles of consolidation**

The consolidated financial statements include the financial statements of the Bank and its subsidiaries as at 31 December 2020. The reporting dates of the subsidiaries and the Bank are identical and the subsidiaries' accounting policies conform to those used by the Bank for like transactions and events in similar circumstances.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Specifically, the Group controls an investee if and only if the Group has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Principles of consolidation (continued)**

Profit or loss and each component of Other Comprehensive Income ("OCI") are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- a) Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- b) Derecognises the carrying amount of any non-controlling interest;
- c) Derecognises the cumulative transaction differences, recorded in equity;
- d) Recognises the fair value of consideration received;
- e) Recognises the fair value of any investment retained;
- f) Recognises any surplus or deficit in the consolidated statement of income; and
- g) Reclassifies the parent's share of a component previously recognised in OCI to consolidated statement of income or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The principal subsidiaries of the Bank are as follows:

<i>Name of the subsidiary</i>	<i>Country of incorporation</i>	<i>Ownership at 31 December</i>		<i>Year of incorporation</i>

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Business combinations (continued)**

**Business combinations**

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are expensed and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through the consolidated statement of income. It is then considered in the determination of goodwill.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IAS 39 Financial Instruments: Recognition and Measurement, is measured at fair value with the changes in fair value recognised in the consolidated statement of income.

**Goodwill and other Intangible assets**

*Goodwill*

Goodwill represents the excess of the cost of acquisition over the Group's share of the fair value of the net identifiable assets of the acquired subsidiary or associate at the date of the acquisition. Goodwill arising on the acquisition of an associate is included in the carrying amount of the respective associate and, therefore, is not separately tested for impairment. Goodwill arising on the acquisition of a subsidiary is recognised as a separate asset in the consolidated statement of financial position.

Goodwill acquired in a business combination is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the Bank's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities acquired.

If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in the consolidated statement of income.

After initial recognition, goodwill is stated at cost less any accumulated impairment losses. Goodwill of subsidiaries is allocated to cash-generating units and is tested annually for impairment. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. The recoverable amount of a cash-generating unit is the higher of the cash-generating unit's fair value less costs to sell, and its value in use. Any impairment loss recognised for goodwill is not reversed in a subsequent period.

On disposal of a part of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

*Other Intangible assets*

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or infinite.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Goodwill and other Intangible assets (continued)**

*Other Intangible assets (continued)*

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the consolidated statement of income in the expense category that is consistent with the function of the intangible assets.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of income.

**Investments in associates**

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in its associates are accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The consolidated statement of income reflects the Group's share of the results of operations of the associate. Any change in Other Comprehensive Income (OCI) of those investees is presented as part of the Group's consolidated OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the Group's interest in the associate.

The financial statements of associates are prepared for the same reporting period as that of the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investments in its associates. At each reporting date, the Group determines whether there is objective evidence that an investment in an associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the investment in associate and its carrying value and then recognises the loss as 'Share of results of associates' in the consolidated statement of income.

Upon loss of significant influence over an associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in the consolidated statement of income.

**Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial instruments (continued)**

*Date of recognition*

Financial assets and liabilities, with the exception of loans and receivables, due to banks and other financial institutions and deposits from customers, are initially recognised on the trade date, i.e., the date that the Group becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and receivables are recognised when funds are transferred to the customers' accounts. The Group recognises due to banks and other financial institutions and deposits from customers when funds are transferred to the Group.

*Initial measurement*

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. At initial recognition, the Group measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at FVTPL, transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in statement of consolidated income. Immediately after initial recognition, an ECL is recognised for financial assets measured at amortised cost and in debt instruments measured at FVOCI, which results in an accounting loss being recognised in the consolidated statement of income when an asset is newly originated.

When the fair value of financial assets and liabilities at initial recognition differs from the transaction price, the Group accounts for the Day 1 profit or loss as follows:

- (a) When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses data only from observable markets, the difference is recognised as a day 1 gain or loss.
- (b) In all other cases, the difference is deferred and the timing of recognition of deferred day 1 profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or when the instrument is derecognised.

*Measurement categories of financial assets and liabilities*

The Group classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost.
- Fair value through other comprehensive income (FVOCI); or
- Fair value through profit or loss (FVTPL);

The Group classifies and measures its derivative and trading portfolio at FVTPL. The Group may designate financial instruments at FVTPL, if doing so eliminates or significantly reduces measurement or recognition inconsistencies.

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost or at FVTPL when they are derivative instruments.

**Financial assets**

*Classification and subsequent measurement*

The classification requirements for financial assets is as below:

*Debt type Instrument: Classification and Subsequent measurement:*

Classification and subsequent measurement of debt instruments depend on:

- (i) the Group's business model for managing the asset; and
- (ii) the cash flow characteristics of the asset i.e. solely payments of principal and interest (SPPI) test.

Based on these factors, the Group classifies its debt instruments into one of the following three measurement categories:

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial assets (continued)**

*Debt type Instrument: Classification and Subsequent measurement: (continued)*

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent SPPI, and that are not designated at FVTPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any ECL allowance recognised. Interest income from these financial assets is included in 'Interest income' using the EIR method.
- FVOCI: Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and that are not designated at FVTPL, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in consolidated statement of income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to consolidated income and recognised in 'Investment income - net' as 'Gain on disposal of non-trading securities'. Interest income from these financial assets is included in 'Interest income' using the EIR method.
- FVTPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at FVTPL and is not part of a hedging relationship is recognised in consolidated profit or loss and presented in the consolidated statement of income within 'Investment income - net' as 'Gain on trading securities' in the period in which it arises, unless it arises from debt instruments that were designated at fair value or which are not held for trading, in which case they are presented separately in 'Investment income - net' as 'Gain on disposal of non-trading securities'. Interest income from these financial assets is included in 'Interest income' using the EIR method.

*Business model*

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The business model reflects how the Group manages the assets in order to generate cash flows. That is, whether the Group's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'held for trading' business model and measured at FVTPL. The business model assessment is not carried out on an instrument-by-instrument basis but at the aggregate portfolio level and is based on observable factors such as:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- How the asset's and business model performance is evaluated and reported to key management personnel and Asset and Liability Committee (ALCO);
- How risks are assessed and managed; and
- The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Group's stated objective for managing the financial assets is achieved and how cash flows are realised.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Financial assets that are held for trading and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial assets (continued)**

*SPPI test*

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

Principal for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

Interest is the consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement.

In assessing whether the contractual cash flows are SPPI, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers:

- the currency in which the financial asset is denominated, and the period for which the interest rate is set;
- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms; and
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse asset arrangements).

Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent.

*Equity type instruments: classification and subsequent measurement*

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares.

*Equity instruments at FVOCI*

Upon initial recognition, the Group may elect to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of Equity under IAS 32 *Financial Instruments: Presentation* and are not held for trading. Such classification is determined on an instrument-by-instrument basis. Fair value gains and losses are recognised in other comprehensive income and are not subsequently reclassified to consolidated statement of income, including on disposal. Equity investments at FVOCI are not subject to impairment assessment. Equity investments at FVOCI are included in non-trading investments in the consolidated statement of financial position. All other equity investments which the Group has not irrevocably elected at initial recognition or transition, to classify at FVOCI, are recognised at

*Financial asset at FVTPL*

The Group classifies financial assets at fair value through profit or loss when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading assets are recorded and measured in the consolidated statement of financial position at fair value. In addition, on initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. Changes in fair values gain and losses, financing income and dividends are recorded in consolidated statement of income according to the terms of the contract, or when the right to payment has been established.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial assets (continued)**

*Financial asset at FVTPL (continued)*

Dividends are recognised in the consolidated statement of income as 'Investment income - net' when the Group's right to receive payments is established.

**Impairment**

The Group assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

To calculate ECL, the Group estimates the risk of a default occurring on the financial instrument during its expected life. ECLs are estimated based on the present value of all cash shortfalls over the remaining expected life of the financial asset, i.e., the difference between: the contractual cash flows that are due to the Group under the contract, and the cash flows that the Group expects to receive, discounted at the effective interest rate of the loan or an approximation thereof.

*Measurement of ECL*

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive);
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- undrawn loan commitments: estimates the expected portion of the loan commitment that are drawn down over the expected life of the loan commitment; and calculates the present value of cash shortfalls between the contractual cash flows that are due to the entity if the holder of the loan commitment draws down that expected portion of the loan and the cash flows that the entity expects to receive if that expected portion of the loan is drawn down; and
- financial guarantee contracts: estimates the ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the guarantor expects to receive from the holder, the debtor or any other party. If a loan is fully guaranteed, the ECL estimate for the financial guarantee contract would be the same as the estimated cash shortfall estimate for the loan subject to the guarantee.

For the purposes of calculation of ECL, the Group categorises its FVOCI debt securities, loans and receivable and loan commitments and financial guarantee contracts into Stage 1, Stage 2 and Stage 3, based on the applied impairment methodology, as described below:

- Stage 1 – Performing: when loans are first recognised, the Group recognises an allowance based up to 12-month ECL.
- Stage 2 – Significant increase in credit risk: when a loan shows a significant increase in credit risk, the Group records an allowance for the lifetime ECL.
- Stage 3 – Impaired: the Group recognises the lifetime ECL for these loans.

For the purposes of categorisation into above stages, the Group has established a policy to perform an assessment at the end of each reporting period of whether credit risk has increased significantly since initial recognition by considering the change in the risk of default occurring over the remaining life of the financial instrument.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Impairment (continued)**

*Measurement of ECL (continued)*

The Group records impairment for FVOCI debt securities, depending on whether they are classified as Stage 1, 2, or 3, as explained above. However, the ECL does not reduce the carrying amount of these financial assets in the consolidated statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the asset were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss.

No impairment is recorded on equity investments.

*Stage 1*

The Group measures loss allowances at an amount up to 12-month ECL for Stage 1 customers. All financial assets are classified as Stage 1 on initial recognition date. Subsequently on each reporting date the Group classifies following as Stage 1:

- debt type assets that are determined to have low credit risk at the reporting date; and
- on which credit risk has not increased significantly since their initial recognition.

*Stage 2*

IFRS 9 requires financial assets to be classified in Stage 2 when their credit risk has increased significantly since their initial recognition. For these assets, a loss allowance needs to be recognised based on their lifetime ECLs.

The Group considers whether there has been a significant increase in credit risk of an asset by comparing the rating migration upon initial recognition of the asset against the risk of a default occurring on the asset as at the end of each reporting period. In each case, this assessment is based on forward-looking assessment that takes into account a number of economic scenarios, in order to recognise the probability of higher losses associated with more negative economic outlooks.

It is the Group's policy to evaluate additional available reasonable and supportive forward-looking information as further additional drivers.

*Stage 3*

Financial assets are included in Stage 3 when there is objective evidence that the financial asset is credit impaired. At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt financial assets carried at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a loan that is overdue for 90 days or more is considered impaired.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Impairment (continued)**

*Stage 3 (continued)*

In making an assessment of whether an investment in sovereign debt is credit-impaired, the Group considers the following factors.

- The market's assessment of creditworthiness as reflected in the bond yields.
- The rating agencies' assessments of creditworthiness.
- The country's ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the

Other than originated credit-impaired loans, loans are transferred from Stage 3 if they no longer meet the criteria of credit-impaired after a probation period of 12 months.

*Forward looking information*

The Group incorporates forward-looking information in the measurement of ECLs.

The Group considers forward-looking information such as macroeconomic factors (e.g., GDP growth, oil prices, country's equity indices and unemployment rates) and economic forecasts.

The Group uses internal information coming from internal economic experts, combined with published external information from government and private economic forecasting services. These forward looking assumptions undergo an internal governance process before they are applied for different scenarios.

*Presentation of allowance for ECL in the statement of financial position*

Loss allowances for ECL are presented in the consolidated statement of financial position as follows:

- financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets;
- loan commitments and financial guarantee contracts: as a provision under other liabilities; and
- debt instruments measured at FVOCI: no loss allowance is recognised in the consolidated statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the cumulative changes in fair value

*Limitation of estimation techniques*

The models applied by the Group may not always capture all characteristics of the market at a point in time as they cannot be recalibrated at the same pace as changes in market conditions. Interim adjustments are expected to be made until the base models are updated. Although the Group uses data that is as current as possible, models used to calculate ECLs are based on data that is up to date except for certain factors for which the data is updated once it is available and adjustments are made for significant events occurring prior to the reporting date.

*Experienced credit adjustment*

The Group's ECL allowance methodology requires the Group to use its experienced credit judgement to incorporate the estimated impact of factors not captured in the modelled ECL results, in all reporting periods.

For more details on the impairment calculations and policy refer to note 4 to these consolidated financial statements.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Derivatives and hedging activities**

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Group enters into derivative transactions with various counterparties. These include interest rate swaps and forward foreign exchange contracts. Derivatives are initially recognised at fair value on the date on which the derivative contract is entered into and are subsequently remeasured at fair value. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated and qualifies as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either:

- (a) Hedges of the fair value of recognised assets or liabilities or firm commitments (fair value hedges);
- (b) Hedges of highly probable future cash flows attributable to a recognised asset or liability (cash flow hedges); or
- (c) Hedges of a net investment in a foreign operation (net investment hedges).

The Group documents, at the inception of the hedge, the relationship between hedged items and hedging instruments, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

**(a) Fair value hedge**

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the consolidated statement of income, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity and recorded as net interest income.

**(b) Cash flow hedge**

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the consolidated statement of income.

Amounts accumulated in equity are recycled to the consolidated statement of income in the periods when the hedged item affects income or loss. They are recorded in the income or expense lines in which the revenue or expense associated with the related hedged item is reported.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised in the periods when the hedged item affects income or loss. When a forecast transaction is no longer expected to occur (for example, the recognised hedged asset is disposed of), the cumulative gain or loss previously recognised in other comprehensive income is immediately reclassified to the consolidated statement of income.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Derivatives and hedging activities (continued)**

**(c) Net investment hedge**

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised directly in other comprehensive income; the gain or loss relating to the ineffective portion is recognised immediately in the consolidated statement of income. Gains and losses accumulated in equity are included in the consolidated statement of income when the foreign operation is disposed of as part of the gain or loss on

**Derivative product types**

Forwards and futures are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the over-the-counter market. Foreign currency and interest rate futures are transacted in standardised amounts on regulated exchanges and are subject to daily cash margin requirements. Forward rate agreements are effectively tailor-made interest rate futures which fix a forward rate of interest on a notional loan, for an agreed period of time starting on a specified future date.

Swaps are contractual agreements between two parties to exchange interest or foreign currency amounts based on a specific notional amount. For interest rate swaps, counterparties generally exchange fixed and floating rate interest payments based on a notional value in a single currency. For cross-currency swaps, notional amounts are exchanged in different currencies. For cross-currency interest rate swaps, notional amounts and fixed and floating interest payments are exchanged in different currencies.

Options are contractual agreements that convey the right, but not the obligation, to either buy or sell a specific amount of a commodity or financial instrument at a fixed price, either at a fixed future date or at any time within a specified period.

**Derivative related credit risk**

Credit risk in respect of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligations and is limited to the positive fair value of instruments that are favourable to the Group. The majority of the Group's derivative contracts are entered into with other financial institutions and there is no significant concentration of credit risk in respect of contracts with positive fair value with any individual counterparty at the report date.

As part of its asset and liability management the Group uses derivatives for hedging purposes in order to reduce its exposure to currency and interest rate risks. This is achieved by hedging specific financial instruments, forecasted transactions as well as strategic hedging against overall statement of financial position exposures. For interest rate risk this is carried out by monitoring the duration of assets and liabilities using simulations to estimate the level of interest rate risk and entering into interest rate swaps and futures to hedge a proportion of the interest rate exposure, where appropriate. Since strategic hedging does not qualify for special hedge accounting related derivatives are accounted for as trading instruments.

The Group uses forward foreign exchange contracts and currency swaps to hedge against specifically identified currency risks. In addition, the Group uses interest rate swaps to hedge against the interest rate risk arising from specifically identified loans and securities bearing fixed interest rates. In all such cases the hedging relationship and objective, including details of the hedged item and hedging instrument, are formally documented and the transactions are accounted for as hedges.

The Group applies hedge accounting in two separate hedging strategies, as follows:

**Interest rate risk on fixed rate debt type instruments (fair value hedge)**

The Group holds a portfolio of long-term variable and fixed rate loans / securities and therefore is exposed to changes in fair value due to movements in market interest rates. The Group manages this risk exposure by entering into pay fixed / receive floating interest rate swaps.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Interest rate risk on fixed rate debt type instruments (fair value hedge) (continued)**

Only the interest rate risk element is hedged and therefore other risks, such as credit risk, are managed but not hedged by the Group. The interest rate risk component is determined as the change in fair value of the long-term variable / fixed rate loans and securities arising solely from changes in LIBOR (the benchmark rate of interest). Such changes are usually the largest component of the overall change in fair value. This strategy is designated as a fair value hedge and its effectiveness is assessed by comparing changes in the fair value of the loans attributable to changes in the benchmark rate of interest with changes in the fair value of the interest rate swaps.

The Group establishes the hedging ratio by matching the notional of the derivatives with the principal of the portfolio being hedged. Possible sources of ineffectiveness are as follows:

- (i) differences between the expected and actual volume of prepayments, as the Group hedges to the expected repayment date taking into account expected prepayments based on past experience;
- (ii) hedging derivatives with a non-zero fair value at the date of initial designation as a hedging instrument; and
- (iii) counterparty credit risk which impacts the fair value of uncollateralised interest rate swaps but not the hedged items.

**Net investment in foreign operation (net investment hedge)**

The Group has investments in foreign operations which are consolidated in these financial statements. The foreign exchange rate exposure arising from this investment is hedged through the use of forward exchange contracts. These contracts are designated as net investment hedges to hedge the equity of the foreign operations. The Group establishes the hedging ratio by matching the contracts with the net assets of the foreign operations.

**Hedge ineffectiveness**

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument. For hedges of exposures to fluctuations in foreign exchange rates, the Group enters into hedge relationships where the critical terms of the hedging instrument match exactly with the terms of the hedged item. The Group therefore performs a qualitative assessment of effectiveness.

In hedges of foreign currency exposures, ineffectiveness may arise if the timing of the cash flows changes from what was originally estimated, or if there are changes in the credit risk of the Bank or the derivative counterparty.

The Group enters into interest rate swaps that have similar critical terms as the hedged item, such as reference rate, reset dates, payment dates, maturities and notional amount. In cases, where the Group does not hedge 100% of its loans, the hedged item is identified as a proportion of the outstanding loans up to the notional amount of the swaps. As all critical terms matched during the year, the economic relationship was 100% effective.

Hedge ineffectiveness for interest rate swaps is assessed using the same principles as for hedges of foreign currency. It may occur due to the credit value/debit value adjustment on the interest rate swaps which is not matched by the loan, and differences in critical terms between the interest rate swaps and loans.

There was no ineffectiveness during 2020 and 2019 in relation to the interest rate swaps. There were no interest rates swaps as at year ended 2020.

**Interest income**

Interest income is recorded using the effective interest rate (EIR) method for all financial instruments measured at amortised cost, designated at FVTPL and those measured at FVOCI. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Fair value measurement**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

**Level 1:** quoted (unadjusted) prices in active markets for identical assets or liabilities;

**Level 2:** valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

**Level 3:** valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

The Group measures financial instruments, such as, derivatives, investments carried at FVTPL or FVOCI and non-financial assets such as investment properties, at fair value at each reporting date.

For financial instruments traded in an active market, fair value is determined by reference to quoted market bid prices for assets and quoted market offer prices for liabilities, without deduction for transaction costs.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indications that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Fair value measurement (continued)**

For financial instruments where there is no active market, fair value is determined using appropriate valuation techniques. Such techniques may include the following:

- brokers' quotes
- recent arm's length market transactions
- the expected cash flows discounted at current rates applicable for items with similar terms and risk characteristics
- option pricing models
- other valuation methods

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount payable on demand.

The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting date with the resulting value discounted back to present value.

The fair value of interest rate swaps is determined by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date.

**Derecognition**

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- (a) the right to receive cash flows from the asset have expired;
- (b) the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' arrangement; or
- (c) the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired.

**Write-off**

Loans and debt securities are written off (either partially or in full) when there is no realistic prospect of recovery. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to consolidated statement of income.

**Investment properties**

All properties held for rental or for capital appreciation purposes, or both, are classified as investment properties. Where a property is partially occupied by the Group and the portions could be sold separately, the Group accounts for the portions separately either as an investment property or property and equipment, as appropriate. If the portions cannot be sold separately, the property is classified as an investment property only if an insignificant portion is held for own use.

The Group applies the fair value model of accounting for investment properties. All investment properties are initially recorded at cost, including acquisition expenses associated with the property.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Investment properties (continued)**

Subsequent to initial recognition, all investment properties are remeasured at fair value and changes in fair value are recognised in the consolidated statement of income. The Group engages independent valuation specialists to determine the fair value of investment properties. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer applying a valuation model recommended by the International Valuation Standards Committee.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

**Property and equipment**

Property and equipment are stated at cost less accumulated depreciation and impairment losses. When assets are sold or retired, their cost and accumulated depreciation are eliminated from the consolidated statement of financial position and any gain or loss resulting from disposal is included in the consolidated statement of income.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs to sell and their value in use.

Depreciation is provided on all property and equipment, except land and work in progress, at rates calculated to write off the cost of each asset on a straight line basis to their residual values over its expected useful life which is between 3 to 5 years for all property and equipment except for certain building fixtures and fittings which are depreciated over expected useful life of 10 years and building civil structure which is depreciated over its expected useful life of 20 years.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

**Financial liabilities**

Financial liabilities comprise of due to banks and other financial institutions, deposits from customers, loans, bonds and other liabilities. These are stated at amortised cost. Transaction costs are amortised over the period of the debt using the effective yield method. Financial liabilities are classified as either FVTPL or at amortised cost. Accounting and subsequent measurement of liabilities at FVTPL is similar to assets at amortised cost except for there being no need for and ECL. In case of financial liabilities at FVTPL all fair value movements are taken to profit or loss except for gains or losses arising from changes to issuers' credit rating which is presented in OCI with no subsequent reclassification to profit or loss.

*Classification and subsequent measurement*

Gains or losses arising from a change in the entity's own credit risk are presented in OCI with no subsequent reclassification to the consolidated statement of income.

**Treasury shares and treasury share reserve**

Treasury shares are own equity instruments of the Bank which are reacquired by the Bank or any of its subsidiaries. These are stated at cost and deducted from equity. Any gain or loss arising on reissuance of treasury shares is taken directly to treasury share reserve in the consolidated statement of changes in equity.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Cash and cash equivalents**

Cash and cash equivalents include cash, demand and call deposits, highly liquid investments that are readily convertible into cash and placements (excluding escrow balances) with original maturities up to ninety days from the date of acquisition.

**Fiduciary assets**

Assets held in a fiduciary capacity are not treated as assets of the Group in the consolidated statement of financial position.

**Dividends on ordinary shares**

The Bank recognises a liability to make cash or non-cash distributions to its equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Bank. A distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

Non-cash distributions are measured at the fair value of the assets to be distributed with fair value re-measurement recognised directly in equity.

Upon distribution of non-cash assets, any difference between the carrying amount of the liability and the carrying amount of the assets distributed is recognised in the consolidated statement of income.

Dividends for the year that are approved after the reporting date are disclosed as an event after the reporting date.

**Taxes**

There is no tax on corporate income in the Kingdom of Bahrain. Taxation on overseas subsidiaries is calculated on the basis of the tax rates applicable and prescribed according to the prevailing laws, regulations and instructions of the countries where these subsidiaries operate. Income tax payable on taxable profit ("current tax") is recognised as an expense in the period in which the profits arise in accordance with the fiscal regulations of the respective countries in which the Group operates.

*Deferred Tax*

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- (a) When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- (b) In respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Taxes (continued)**

*Deferred Tax (continued)*

Deferred tax assets and liabilities are measured using tax rates and applicable legislation at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

**Offsetting**

Financial assets and financial liabilities are only offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to set off the recognised amounts and the Group intends to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

**Employees benefits**

The Group provides for end of service benefits to all its employees. Entitlement to these benefits is usually based upon the employees' length of service and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. National employees of the Bank are also covered by the Social Insurance Organisation scheme and the Bank's obligations are limited to the amount contributed to the scheme.

**Provisions**

Provisions are recognised when the Group has a present obligation (legal or constructive) arising from a past event and the costs to settle the obligation are both probable and reliably measurable.

**Foreign currencies**

The consolidated financial statements have been presented in US Dollars being the functional and presentational currency of the Bank. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded in the functional currency rate of exchange ruling at the date of transaction.

*Translation of foreign currency transactions and balances*

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. Exchange differences arising on the retranslation of monetary items, are included in consolidated statement of income for the year. Non-monetary items measured at fair value in a foreign currency are retranslated using the exchange rates at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary investments carried at fair value through profit or loss are included in the consolidated statement of income for the year. Exchange differences arising on the retranslation of investments carried at fair value through other comprehensive income, are recognised directly in a fair value reserve through the consolidated statement of comprehensive income. Non-monetary items that are measured at historical cost in a foreign currency are translated using the spot exchange rates as at the date of recognition.

*Translation of financial statements of foreign operations*

Assets (including goodwill) and liabilities of foreign operations are translated at the exchange rates prevailing at the reporting date. Income and expense items are translated at average exchange rates for the relevant period. All resulting exchange differences are taken directly to a foreign currency translation reserve in equity through OCI.

On disposal of a foreign operation, the component of consolidated OCI relating to that particular foreign operation is recognised in the consolidated statement of income.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Recognition of income and expenses**

Interest income and related fees are recognised using the effective yield method, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense.

Recognition of interest income is suspended when the related financial asset becomes impaired. Notional interest is recognised on impaired financial assets based on the rate used to discount future cash flows to their net present value.

Commission income and other fees are recognised when earned.

*Performance-based fees*

Performance-based fees are not recognised until it is highly probable that a significant reversal in the amount of cumulative revenue will not occur. The recognition of performance-based fees requires significant judgement and is unlikely to be recognised in full until it is crystallised or is no longer subject to clawback.

*Advisory income*

The Group applies significant judgement to identify the performance obligations in an advisory service contract and whether each service is capable of being distinct in the context of contract. Revenue from these performance obligations are recognised either at a point in time or over time when the respective performance obligations in a contract are delivered to the customer.

Rental income on investment properties is recognised on a straight line basis.

Dividend income is recognised when the Group's right to receive the dividend is established.

**Contingent liabilities and contingent assets**

Contingent liabilities are not recognised in the consolidated financial statements, but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognised in the consolidated financial statements, but are disclosed when an inflow of economic benefits is probable.

**Financial guarantee contracts and commitments**

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognised less cumulative amortisation.

The premium received is recognised in the consolidated statement of income in other operating income on a straight line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of the ECL requirements.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Financial guarantee contracts and commitments (continued)**

The nominal contractual value of financial guarantees and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded in the consolidated statement of financial position.

**Significant assumptions, accounting judgements and estimates**

In the process of applying the Group's accounting policies, management has made the following assumptions, judgements and estimates in determining the amounts recognised in the consolidated financial statements:

*Measurement of the expected credit loss allowance (ECL)*

The measurement of the ECL for financial assets measured at amortised cost and debt instruments at FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions, credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses), estimation of the amount and timing of the future cash flows and collateral values. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculation are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Internal credit rating model, which assigns PDs to the individual ratings;
- Determining criteria for SICR;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs;
- Selection and relative weightings of forward-looking scenarios to derive the economic inputs into the ECL models;
- Establishing groups of similar financial assets for the purposes of measuring ECL; and
- Determining relevant period of exposure with respect to the revolving facilities and facilities undergoing restructuring at the reporting date.

*Classification of financial assets*

Classification of financial assets in the appropriate category depends upon the business model and SPPI test. Determining the appropriate business model and assessing whether the cash flows generated by the financial asset meet the SPPI test is complex and requires significant judgements by management.

The Group applies judgement while carrying out SPPI test and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

*Going concern*

The Group's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

*Impairment of goodwill*

The Group determines whether goodwill is impaired at each reporting date. This requires an estimation of the value in use of the cash generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating unit and also to choose a suitable discount rate in order to calculate the present value of those cash flows.

**2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Significant assumptions, accounting judgements and estimates (continued)**

*Fair value of financial instruments*

Where the fair values of financial assets and financial liabilities recorded in the consolidated statement of financial position cannot be derived from active markets, they are determined using valuation techniques including discounted cash flow models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**Loans and receivables**

Loans and receivables are non-derivative financial assets originated or acquired by the Group with fixed or determinable payments that are not quoted in an active market.

Loans and receivables are recognised when cash is advanced to borrowers. They are derecognised when either borrower repays their obligations, or the loans are sold or written off, or substantially all the risks and rewards of ownership are transferred.

Loans and receivables are initially measured at cost, being the fair value of the consideration given.

Following initial recognition, loans and receivables are stated at cost less any amount written off and specific and collective provisions for impairment.

When a loan is uncollectible and there is no realistic prospect of recovery, it is written off against the related provision. Subsequent recoveries and reductions in provision are credited to provision for doubtful loans in the consolidated statement of income.

**3 NEW AND AMENDED STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE**

A number of new and amended standards and interpretations issued but not yet effective up to the date of issuance of the Group's consolidated financial statements are listed below. This listing is of relevant standards and interpretations issued, which the Group reasonably expects to be applicable at a future date. The Group intends to adopt those standards (where applicable) when they become effective:

*IFRS 17 Insurance Contracts*

In May 2017, the IASB issued IFRS 17 Insurance Contracts (IFRS 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 Insurance Contracts (IFRS 4) that was issued in 2005. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach);
- A simplified approach (the premium allocation approach) mainly for short-duration contracts.

IFRS 17 is effective for reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. This standard is not applicable to the Group.

**3 NEW AND AMENDED STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE (continued)**

*Amendments to IAS 1: Classification of Liabilities as Current or Non-current*

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement;
- That a right to defer must exist at the end of the reporting period;
- That classification is unaffected by the likelihood that an entity will exercise its deferral right;
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

*Reference to the Conceptual Framework – Amendments to IFRS 3*

In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements.

The Board also added an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC 21 Levies, if incurred separately.

At the same time, the Board decided to clarify existing guidance in IFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively.

*Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16*

In May 2020, the IASB issued Property, Plant and Equipment — Proceeds before Intended Use, which prohibits entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

The amendments are not expected to have a material impact on the consolidated financial statements of the Group.

**3 NEW AND AMENDED STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE (continued)**

*Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37*

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a “directly related cost approach”. The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments are effective for annual reporting periods beginning on or after 1 January 2022. The amendments are not expected to have a material impact on the consolidated financial statements of the Group.

*IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter*

As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued an amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards. The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The amendments are not expected to have a material impact on the consolidated financial statements of the Group.

*IFRS 9 Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities*

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 with earlier adoption permitted. The Group will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the Group first applies the amendment.

The amendments are not expected to have a material impact on the consolidated financial statements of the Group.

*IAS 41 Agriculture – Taxation in fair value measurements*

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IAS 41 Agriculture. The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41.

An entity applies the amendment prospectively to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022 with earlier adoption permitted.

The amendments are not expected to have a material impact on the consolidated financial statements of the Group.

#### 4 EXPECTED CREDIT LOSSES

##### Movement in ECL for the year

An analysis of movement in ECL allowances during the year is as follows:

	Stage 1 US\$ 000	Stage 2 US\$ 000	Stage 3 US\$ 000	Total US\$ 000
As at 1 January 2020	14,130	503	8,903	23,536
Transfers from stage 1 and 2 to stage 3	(818)	(192)	1,010	-
Provisions (reversals) during the year - net	956	619	(606)	969
Written-off during the period	-	-	(783)	(783)
Other adjustments	9	(2)	(18)	(11)

<b>As at 31 December 2020</b>	<b>14,103</b>	<b>587</b>	<b>-</b>	<b>14,690</b>

**10 INVESTMENTS IN ASSOCIATES**

	<i>Activity</i>	<i>Carrying value 2020 US\$ 000</i>	<i>Ownership 2020 %</i>	<i>Carrying value 2019 US\$ 000</i>	<i>Ownership 2019 %</i>
		<i>US\$ 000</i>	<i>%</i>	<i>US\$ 000</i>	<i>%</i>
a)	Kamco Investment Fund	Fund	27,884	27	30,807
b)	KAMCO Real Estate Yield Fund	Fund	10,159	36	13,745
c)	N.S. 88 S.P.C.	Real estate	9,986	20	11,424
d)	Manafae Investment Company	Islamic investment	9,985	34	10,951
e)	United Capital Transport Co K.S.C.C.	Services	6,657	40	8,419
f)	Others	Various	4	Various	428
		<b>64,675</b>		<b>75,774</b>	

The Group has no share of any contingent liabilities or capital commitments, as at 31 December 2020 and 2019 on behalf of its associates.

- a) The Group holds a 27% (2019: 23%) equity interest in KAMCO Investment Fund ("KIF") through its subsidiary KAMCO.
- b) The Group holds a 36% (2019: 38%) equity interest in KAMCO Real Estate Yield Fund through its subsidiary KAMCO. The decrease in equity interest is due to subscription of the fund's units by other unit holders during the year.
- c) The Group owns 20% of N.S. 88 S.P.C. through its subsidiary KAMCO (2019: 20%).
- d) The Group owns 34% of Manafae Investment Company through its subsidiary KAMCO (2019: 33%).

**10 INVESTMENTS IN ASSOCIATES (continued)**

- e) United Capital Transport Company K.S.C.C. (UniCap) was incorporated in State of Kuwait in 2011. The Group owns a 40% equity interest through its subsidiary KAMCO (2019: 40%). UniCap is a dedicated leasing solutions provider to governments, international oil companies and varied construction, mining and industrial services businesses.
- f) Others includes associates with carrying values of under US\$ 100 thousand and mainly include Adhari Park Development with group ownership of 20% (2019: 20%), Fina Corporation 49% (2019: 49%), Lotus Financial Investments 0% (2019: 45%) and United Real Estate Company - Syria 20% (2019: 20%).

In accordance with IAS 36 Impairment of Assets, the Group's recoverable amount of these associates (i.e. value in use) was in excess of their carrying values and accordingly no impairment was recognised against these investments during the year ended 31 December 2020 (2019: same).

**Investments in associates that are not individually significant**

As at 31 December 2020 and 2019, all of the Group's investments in associates were not individually significant. The aggregate summarised financial information of the Group's associates that are not individually significant are provided below:

	2020 US\$ 000	2019 US\$ 000
<b>Summarised statement of financial position as of 31 December:</b>		
Total assets	236,713	394,302
Total liabilities	(8,760)	(14,514)
Equity	<u>227,953</u>	<u>379,788</u>
Carrying amount of investments	<u>64,675</u>	<u>75,774</u>
<b>Summarised statement of income for the year ended 31 December:</b>		
Revenue	(21,333)	29,506
(Loss) profit for the year	<u>(31,096)</u>	<u>21,879</u>
Other comprehensive loss for the year	<u>(148)</u>	<u>-</u>
<b>Total comprehensive (loss) income for the year</b>	<b><u>(31,244)</u></b>	<b><u>21,879</u></b>
<b>Group's share of (loss) profit for the year</b>	<b><u>(8,381)</u></b>	<b><u>4,646</u></b>

**11 INVESTMENT PROPERTIES**

	2020 US\$ 000	2019 US\$ 000
At 1 January	102,713	107,629
Reclassification to Property and Equipment	-	(12,734)
Revaluation (loss) gain (note 22)	(3,800)	7,294
Foreign currency translation and other adjustments	<u>(197)</u>	<u>524</u>
At 31 December	<b><u>98,716</u></b>	<b><u>102,713</u></b>

As at 1 January 2019, the Group determined that there is a change in use of a land and building amounting to US\$ 12,734 thousand, and the land and building meets the definition of a owner-occupied property under IAS 16 Property, Plant and Equipment. The Group reclassified the land and building from investment properties to property and equipment.

The fair value of the land and building, as of the date of transfer, was considered to be the deemed cost for subsequent accounting in accordance with IAS 16. The building is being depreciated over 20 years on a straight line basis from the date of transfer.

**11 INVESTMENT PROPERTIES (continued)**

Investment properties comprise of land and buildings owned by the Group. These are stated at fair values, determined based on independent valuations performed by external professional valuers at the year end.

Valuations of investment properties were conducted by independent appraisers with a recognised and relevant professional qualification and recent experience of the location and category of investment property being valued. The discounted future cash flow method or property market value method have been used and deemed appropriate considering the nature and usage of the properties. The Group's investment properties are categorised in level 3 of the fair value hierarchy as at 31 December 2020 and 2019.

Significant increases (decreases) in estimated rental value and rent growth per annum in isolation would result in a significantly higher (lower) fair value of the properties. Significant increases (decreases) in the long-term vacancy rate and discount rate (and exit yield) in isolation would result in a significantly lower (higher) fair value.

**12 PROPERTY AND EQUIPMENT**

2020			<i>Furniture and fixtures</i>	<i>Computers and vehicles</i>	<i>Total</i> US\$ 000

**Goodwill**

The goodwill remaining as of 31 December relates to KAMCO (a subsidiary) and is allocated to the asset management and investment banking operating segment, a cash generating unit (a CGU). The recoverable amount of the CGU is determined based on a value in use calculation using cash flow projections from financial budgets approved by the Group's senior management covering a five year period. The key assumptions used in the value in use calculation include a perpetuity growth rate of 3% (2019: 2%) and discount factor of 8.4% (2019: 8.3%). There was no goodwill impairment identified in 2020 or 2019 as the recoverable amount of the CGU was higher than its net book value.

The calculation of value in use for the CGU is sensitive primarily to the expected growth rate and discount rate. Reasonable changes in these assumptions will not result in an impairment of the goodwill.

**Other intangible assets**

Customer relationships with finite useful lives have a useful economic life of 10 years each and are amortised on a straight line basis.

**14 TAXATION**

The Group's subsidiary in the United States of America was subject to income tax in its respective jurisdiction.

**a) Deferred tax liabilities**

Deferred tax liabilities relate to the following:

	2020 US\$ 000	2019 US\$ 000
Revaluation of investment properties at fair value	3,535	4,573
	<u>3,535</u>	<u>4,573</u>

Reconciliation of deferred tax liabilities is as follows:

	<i>Recognised in consolidated statement of income</i>		
	Opening balance US\$ 000	Closing balance US\$ 000	US\$ 000
<b>2020</b>			
Revaluation of investment properties at fair value	4,573	(1,038)	3,535
	<u>4,573</u>	<u>(1,038)</u>	<u>3,535</u>
<b>2019</b>			
Revaluation of investment properties at fair value	2,666	1,907	4,573
	<u>2,666</u>	<u>1,907</u>	<u>4,573</u>

**b) Income tax (charge) credit**

The major components of income tax (charge) credit for the year ended 31 December are as follows:

	2020 US\$ 000	2019 US\$ 000
<b>Consolidated statement of income</b>		
Current income tax charge	(181)	(120)
Movement in deferred tax liabilities recognised in consolidated statement of income	1,038	(1,907)
<b>Income tax credit (charge) reported in the consolidated statement of income - net</b>		
	<u>857</u>	<u>(2,027)</u>

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2020

### 18 EQUITY (continued)

#### b) Share premium

Share premium represents a non-distributable reserve arising from the exercise of the Bank's Employee Share Option Plan. The reserve is credited with the difference between the proceeds from the exercise of share options and the par value of the shares issued under the plan.

#### c) Statutory reserve

In accordance with the Bahrain Commercial Companies Law and the Bank's articles of association, 10% of the profit for the year is transferred to a statutory reserve until such time as the reserve reaches 50% of the Bank's paid-up share capital. The reserve is not available for distribution, except in circumstances as stipulated in the Bahrain Commercial Companies Law and following the approval of the CBB.

#### d) General reserve

The Directors approved a transfer 10% of the profit of the Group for the year ended 31 December 2019 to general reserve in accordance with the Bank's Articles of Association. No transfers were made for the year ended 31 December 2020 as the Group recorded a loss.

#### e) Dividend paid

No dividend was announced or paid during the years ended 31 December 2020 or 2019.

#### f) Foreign currency translation reserve

The foreign currency translation reserve represents the net foreign exchange gain or loss arising from translating the financial statements of the Bank's foreign subsidiaries and associated companies from their functional currencies into United States Dollars.

### 20 PERPETUAL TIER 1 CAPITAL

On 28 March 2016, the Bank issued Perpetual Additional Tier 1 Capital (the "AT1 Capital") amounting to US\$ 33,000 thousand.

The AT1 Capital constitutes subordinated obligations of the Bank and is classified as equity in accordance with IAS 32: *Financial Instruments – Classification*. The AT1 Capital does not have a maturity date and bears interest on its nominal amount from the date of issue at a fixed annual rate.

# United Gulf Bank B.S.C. (c)

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2020

### 20 PERPETUAL TIER 1 CAPITAL (continued)

The AT1 Capital is redeemable by the Bank at its sole discretion on or after 28 March 2021 or on any interest payment date thereafter subject to the prior consent of the CBB.

The Bank at its sole discretion may elect not to distribute interest and this is not considered an event of default. If the Bank does not pay interest on the AT1 Capital (for whatever reason), then the Bank must not make any other distribution on or with respect to its other shares that rank equally with or junior to the AT1 Capital.

During the year, the Bank acquired certain investments amounting to USD 24.7 million from its parent company UGH.

# United Gulf Bank B.S.C. (c)

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2020

### 27 RELATED PARTY TRANSACTIONS (continued)

Compensation of key management personnel was as follows:

	2020 US\$ 000	2019 US\$ 000
Employee benefits	<u>8,287</u>	<u>8,304</u>

### 28 COMMITMENTS AND CONTINGENCIES

#### ***Credit-related commitments***

Credit-related commitments include commitments to extend credit, standby letters of credit, guarantees and acceptances which are designed to meet the requirements of the Group's customers.

Letters of credit, guarantees (including standby letters of credit) and acceptances committed by the Group to make payments on behalf of customers if certain conditions are met under the terms of the contract.

The Group has the following credit and investment related commitments:

	2020 US\$ 000	2019 US\$ 000
Credit-related commitments:		
Letters of guarantee	<u>2,277</u>	2,237
	<u>2,277</u>	2,237
Investments related commitments *	<u>273</u>	5,152
	<u>2,550</u>	7,389

\* Investment related commitments represent commitments for capital calls of fund structures. These commitments can be called during the investment period of the fund which is normally 1 to 5 years.

**29 DERIVATIVES**

In the ordinary course of business the Group enters into various types of transactions that involve derivative financial instruments.

The table below shows the positive and negative fair values of derivative financial instruments. The notional amount is that of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at year end and are not indicative of either market or credit risk.

	Notional amounts by term to maturity					
	Positive fair value US\$ 000	Negative fair value US\$ 000	Notional amount Total US\$ 000	Within 3 months US\$ 000	3 - 12 months US\$ 000	1 - 5 years US\$ 000

Interest rate swap	148	-	75,000	-	75,000	-
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>

\* The Group uses foreign currency denominated borrowings and forward currency contracts to manage some of its transaction exposures. These currency forward contracts are not designated as cash flow, fair value or net investment in foreign operations hedges and are entered into for periods consistent with currency transaction exposures.

Forward foreign exchange contracts are contractual agreements to either buy or sell a specified currency, at a specific price and date in the future, and are customised contracts transacted in the over-the-counter market.

Swaps are contractual agreements between two parties to exchange interest or foreign currency differentials based on a specific notional amount. For interest rate swaps, counterparties generally exchange fixed and floating rate interest payments based on a notional value in a single currency.

**Hedge of net investments in foreign operations**

The Bank has designated certain forward foreign exchange contracts to hedge against changes in the value of its investments in foreign operations for an amount of US\$ 191 million (KWD 50 million and EUR 24 million) [2019: US\$ 191 million (KWD 50 million and EUR 24 million)]. Gains or losses on the retranslation of these forward foreign exchange contracts are transferred to equity through other comprehensive income to offset any gains or losses on the translation of the net investments in foreign operations.

**29 DERIVATIVES (continued)****Cash flow hedges**

The Group is exposed to variability in interest cash flows on liabilities which bear interest at a variable rate. The Group uses interest rate swaps as cash flow hedges of these interest rate risks. A schedule indicating as at 31 December, the periods when the net cash flows are expected to occur and when they are expected to affect the consolidated statement of income is as follows:

	<b>2020</b>		<b>2019</b>	
	<b>Within</b>		<b>Within</b>	
	<b>1 year</b>	<b>1-5 years</b>	<b>1 year</b>	<b>1-5 years</b>
Net cash outflows (liabilities)			376	-
Other comprehensive income			148	-

**30 RISK MANAGEMENT****a) Introduction**

Risk is inherent in the Group's activities but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is considered critical to the Group's continuing profitability.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. They are monitored through the Group's strategic planning process.

The major risks to which the Group is exposed while conducting its business and operations, and the means and organisational structure it employs to manage them strategically for building shareholder value, are outlined below.

**Risk management structure**

Each subsidiary within the Group is responsible for managing its own risks and has its own Board Committees, including Audit and Executive Committees in addition to other management committees such as Credit/Investment Committee and Asset and Liability Committees (ALCO), or equivalent, with responsibilities generally the same as the Bank's committees.

The Board's role is to approve investment strategies of the Bank. However, it has delegated authority for the day-to-day decision making to the Executive Committee so that risk can be effectively managed within the Bank.

The Board of Directors has delegated the executive management of the Bank to the Chief Executive Officer (who is not a Director) and has appointed several Board Committees to work with them and to form and define policies and approve procedures for all of the Bank's activities.

The Executive Management of the Bank is headed by the Chief Executive Officer who is broadly responsible for the day to day conduct of the Bank's business in line with the Board's approved policies and procedures and complements and facilitates the Board in meeting its responsibility towards all stakeholders. He is assisted by the six members of the Bank's management team, each of whom is responsible for his or her respective department. Several management committees have been formed which are chaired by the Chief Executive Officer.

**Executive Committee**

The Executive Committee comprises of four directors including the Chairman, Vice Chairman and two other directors. Board meetings are held through circulation to approve all proposals not within the Investment Committee's risk authority, as well as to act on all matters within the Board's remit.

**30 RISK MANAGEMENT (continued)**

**a) Introduction (continued)**

**Risk management structure (continued)**

*Investment Committee*

The Investment Committee is mainly responsible for approving or recommending approval to the Executive Committee limits for individual exposures, investments and concentrations towards banks, countries, industries, risk rating classes, or other special risk asset categories. In addition, the Committee also monitors the overall risk profile of the Bank and recommends provision levels to the Executive Committee. The Investment Committee is constituted by a majority motion passed in the Executive Committee. Currently the Committee consists of four members.

*Audit Committee*

The Audit Committee is appointed by the Board and consists of four members who are Directors, including three independent Directors. The Audit Committee assists the Board in carrying out its responsibilities with respect to assessing (a) the quality and integrity of financial reporting, (b) the audit thereof, (c) the soundness of the internal controls of the Bank, (d) the risk assessment of the Bank's activities, and (e) the methods for monitoring compliance with laws, regulations and supervisory and internal policies.

*Risk and Compliance*

The Risk and Compliance Committee is responsible for the monitoring and assessment of risks facing the Bank, the review of compliance with internal and external guidelines, the review and recommendation of provisioning requirements, the assessment of the impact on the Bank from new regulatory requirements, and review of Investment Committee decisions. The Committee comprises of six senior executives of the Bank including the Chief Executive Officer. Additionally, the Head of Internal Audit and Quality Assurance participates in the Committee meetings in the capacity of an observer.

*Asset and Liability Committee*

The Asset and Liability Committee establishes policies and objectives for the asset and liability management of the Bank's statement of financial position in terms of structure, distribution, risk and return and its impact on profitability. It also monitors the cash flow, tenor and cost/yield profiles of assets and liabilities and evaluates the Bank's financial position both from interest rate sensitivity and liquidity points of view, making corrective adjustments based upon perceived trends and market conditions, monitoring liquidity, monitoring foreign exchange exposures and positions. The Committee comprises of six senior executives of the Bank including the Chief Executive Officer.

*Management Committee*

The Management Committee acts as the steering committee of the Bank as well as a management forum to discuss any relevant issues. It meets on a weekly basis and consists of the Chief Executive Officer and all Department Heads as well as Internal Audit. It also serves to follow up on a weekly basis on the daily conduct of the Bank's business activities. The Committee is headed by the Chief Executive Officer.

*Key Persons Committee*

The Key Persons Committee comprises three members of senior management. The Committee is mainly responsible for the supervision of adequacy of compliance with the CBB and Bahrain Bourse guidelines on key persons trading (insider trading).

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that the Bank is willing to accept, with additional emphasis on selected geographies and industry sectors. In addition, the Bank monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

**30 RISK MANAGEMENT (continued)**

**a) Introduction (continued)**

*Nominating and Remunerations Committee*

The Nominating and Remuneration Committee (NRC) assists the Board in assessing the skills set of Board members and is responsible to oversee the preparation of appropriate nomination documents and notifications proposing candidates for directorships. It reviews the independence of directors on an annual basis, supervises the preparation of induction materials and orientation sessions, makes recommendations to the Board regarding the management structure and ensures that there is a succession plan in place. The NRC comprises of three members, all of whom are independent.

The NRC also recommends/ reviews the remuneration policies for the Board of Directors and senior management and submits recommendations for shareholders' approval.

**Risk mitigation**

As part of its overall risk management, the Group uses derivatives and other instruments to manage exposures resulting from changes in interest rates and foreign currency transactions.

The risk profile is assessed before entering into hedge transactions, which are authorised by the appropriate level of seniority within the Group.

Where warranted, the Group enters into legally enforceable netting arrangements covering its money market and foreign exchange trading activities whereby the only net amounts may be settled at maturity. With regard to the credit risk in the off statement of financial statement exposures, third party guarantees are obtained wherever possible as a risk mitigation measure.

**Concentration risk**

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the Group's policies and procedures include specific guidelines to focus on country and counterparty limits and maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. Robust limit structures put in place by the Board ensures effective monitoring and control of concentration risk and any limit breaches are immediately rectified and reported to the Board.

**b) Credit risk**

Credit risk arises from the extension of credit facilities in the Group's banking and trading activities as well as in investment activities where there is a possibility that a counterparty may fail to honour its commitment whenever an investment may fail.

Credit risk is mitigated through:

- (i) Establishing an appropriate credit risk environment;
- (ii) Operating under a sound credit and investment approval process;
- (iii) Maintaining appropriate credit administration, measurement and monitoring processes; and
- (iv) Ensuring adequate controls over the credit risk management process.

The Group has well defined policies approved at the individual board level. These provide carefully documented guidelines for credit risk management. There is a two tier committee structure to approve and review credit and investment risk. The Investment Committee comprises of the Chief Executive Officer, Head of Treasury and the Chief Financial Officer. The Head of Credit and Risk Management acts as a non-voting member to the Committee. Exposures beyond Investment Committee limits are approved by the Board's Executive Committee or by the Board of Directors.

**30 RISK MANAGEMENT (continued)**

**b) Credit risk (continued)**

**Maximum exposure to credit risk without taking account of any collateral or other credit enhancements**

The table below shows the Group's maximum exposure to credit risk for the components of on and off statement of financial position exposure. The maximum exposure shown is gross before the effect of mitigation through the use of collateral arrangements, but after any expected credit losses.

	<b>2020</b> <b>US\$ 000</b>	<b>2019</b> <b>US\$ 000</b>
Demand and call deposits with banks	<b>111,000</b>	71,369
Placements with banks	<b>72,486</b>	236,110
Investments carried at FVTPL	<b>12,436</b>	13,070
Investments carried at amortised cost	-	280
Loans and receivables	<b>33,098</b>	27,778
Other assets	<b>61,456</b>	62,174
Letters of guarantee	<b>2,277</b>	2,237
Derivative financial assets	-	148
	<b>292,753</b>	413,166

**Risk concentrations of the maximum exposure to credit risk**

Concentration of risk is managed by client/counterparty, by geographical region and by industry sector. The maximum credit exposure to any single client or counterparty as of 31 December 2020 was US\$ 34.7 million (2019: US\$ 61.8 million) before taking account of collateral or other credit enhancements.

An analysis of the Group's financial assets by geographical region, before taking into account collateral held or other credit enhancements, is as follows:

	<i>Middle East and North Africa</i>					<b>Total</b> <b>US\$ 000</b>
	<b>G.C.C.</b> <b>US\$ 000</b>	<b>Europe</b> <b>US\$ 000</b>	<b>Americas</b> <b>US\$ 000</b>	<b>Others</b> <b>US\$ 000</b>

**Collateral and other credit enhancements**

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters.

The main types of collateral obtained mainly include charges over trading securities.

The Group also obtains guarantees from parent companies for loans to their subsidiaries.

Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement, during its review of the adequacy of the allowance for impairment losses.

Derivative financial assets	148	-	-	148
	<b>297,579</b>	<b>318</b>	<b>115,269</b>	<b>413,166</b>

It is the Group's policy to maintain accurate and consistent risk ratings across the credit portfolio. This facilitates focused management of the applicable risk and the comparison of credit exposures across all business lines, geographic regions and products. All externally rated credit risk exposures are rated by the relevant External Credit Assessment Institutions ("ECAs").

Additionally, the internal risk ratings of the Group's externally unrated credit risk exposures which are largely subjective, are tailored to the various categories and are derived in accordance with the internal rating policy and practices. The attributable internal risk ratings are assessed and updated on a regular basis.

**30 RISK MANAGEMENT (continued)****b) Credit risk (continued)****Credit risk exposure for each credit rating (continued)**

The table above reflects the risk ratings of the credit risk exposures rated by the relevant ECAs. All of the externally unrated credit risk exposures have been classified under "Unrated" category.

**Restructured loans**

Where possible, the Group seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, the loan is no longer considered past due. The Group has not restructured any loans as of 31 December 2020 (31 December 2019: Same).

Restructured loans have a minimum cool-off period of 12 months, from the date when the condition(s) that caused an account to move to Stage 2 or Stage 3 ceases to exist, and provided that up to date payments are received with no arrears.

**Offsetting financial assets and financial liabilities**

The disclosures set out in the table below include financial assets and financial liabilities that are offset in the Group's statement of financial position:

	<i>Loans receivables US\$ 000</i>	<i>Customer deposits US\$ 000</i>
<b>31 December 2020</b>		
Gross amounts of recognised financial asset / liability	325,000	325,000
Gross amounts offset in the consolidated statement of financial position	(325,000)	(325,000)
Net amount of financial asset / (liability) presented in the consolidated statement of financial position	-	-
	<hr/>	<hr/>
<b>31 December 2019</b>		
Gross amounts of recognised financial asset / liability	285,000	285,000
Gross amounts offset in the consolidated statement of financial position	(285,000)	(285,000)
Net amount of financial asset / (liability) presented in the consolidated statement of financial position	-	-
	<hr/>	<hr/>

**c) Market risk**

Market risk is defined as the risk of losses in the value of on-or-off statement of financial position financial instruments caused by a change in market prices or rates, (including changes in interest rates and foreign exchange rates). The Group's policy guidelines for market risk have been vetted by the Board of Directors in compliance with the rules and guidelines provided by the CBB. The CBB guidelines introduced a risk measurement framework whereby all locally incorporated banks in Bahrain are required to measure and apply capital charges in respect of their market risk in addition to capital requirements for credit risk and operational risk.

The market risk subject to capital charge normally arises from changes in value due to market forces in the following exposures:

- Interest rate instruments and securities in the trading book; and
- Foreign exchange throughout the banking book.

The Group has entered into forward foreign exchange contracts for hedging and trading purposes.

**30 RISK MANAGEMENT (continued)**

**c) Market risk (continued)**

**Interest rate risk**

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within the established limits.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's consolidated statement of income based on the consolidated statement of financial position as of 31 December:

Currency	Sensitivity of		Sensitivity of	
	Increase in	net interest	Increase in	net interest
	basis	income	basis	income
	points	2020	points	2019
Kuwaiti Dinar	+ 25	(355)	+ 25	(94)
United States Dollar	+ 25	(77)	+ 25	180
Euro	+ 25	(5)	+ 25	(13)
Pound Sterling	+ 25	5	+ 25	1
Others	+ 25	72	+ 25	29

The decrease in the basis points will have an opposite impact on the net interest income.

The sensitivity of the consolidated statement of income is the effect of the assumed changes in interest rates on the net interest income for one year, based on the floating rate financial assets and financial liabilities held at 31 December 2020, including the effect of hedging instruments.

**Currency risk**

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Group considers the United States Dollar as its functional currency. Positions are monitored on a daily basis and hedging strategies used to ensure positions are maintained within established limits.

The table below indicates the effect on profit before tax for the positions as at statement of financial position date as a result of change in the currency rate with all other variables held constant.

Currency	Effect on		Effect on			
	Change in	profit	Change in	profit	Effect on	
	currency	before tax	equity	before tax	equity	
	rate in %	2020	2020	2019	2019	
Kuwaiti Dinar	+2	(4,181)	1,199	+2	(2,265)	1,137
	-2	4,181	(1,199)	-2	2,265	(1,137)
Euro	+2	(444)	591	+2	(624)	538
	-2	444	(591)	-2	624	(538)
Pound Sterling	+2	88	-	+2	11	-
	-2	(88)	-	-2	(11)	-

### 30 RISK MANAGEMENT (continued)

#### c) Market risk (continued)

##### **Equity price risk**

Equity price risk arises from the change in fair values of equity investments. The Group manages this risk through diversification of investments in terms of geographical distribution and industry concentration.

The geographical distribution of the Group's equity investments is as follows:

##### **Geographical distribution**

At 31 December 2020	<i>Middle East/ Africa</i>		<i>North America</i>		<i>Total</i> <i>US\$ 000</i>
	<i>US\$ 000</i>	<i>US\$ 000</i>	<i>US\$ 000</i>	<i>US\$ 000</i>	
<b>Investments carried at fair value through profit or loss</b>					
Quoted equities	7,834	-	51	31	7,916
Unquoted equities	-	-	2,555	-	2,555
Managed funds	32,041	7,952	8,131	805	48,929
	<b>39,875</b>	<b>7,952</b>	<b>10,737</b>	<b>836</b>	<b>59,400</b>
<b>Investments carried at fair value through other comprehensive income</b>					
Quoted equities	2,506	-	-	-	2,506
Unquoted equities	77,779	30,591	9,180	-	117,550
Managed funds	33	-	-	-	33
	<b>80,318</b>	<b>30,591</b>	<b>9,180</b>	<b>-</b>	<b>120,089</b>
<b>Total</b>	<b>120,193</b>	<b>38,543</b>	<b>19,917</b>	<b>836</b>	<b>179,489</b>
At 31 December 2019					
	<i>North Africa</i> <i>US\$ 000</i>	<i>Europe</i> <i>US\$ 000</i>	<i>North America</i> <i>US\$ 000</i>	<i>Others</i> <i>US\$ 000</i>	<i>Total</i> <i>US\$ 000</i>
<b>Investments carried at fair value through profit or loss</b>					
Quoted equities	13,512	-	1	32	13,545
Unquoted equities	496	909	2,930	-	4,335
Managed funds	54,403	8,535	3,890	-	66,828
	<b>68,411</b>	<b>9,444</b>	<b>6,821</b>	<b>32</b>	<b>84,708</b>
<b>Investments carried at fair value through other comprehensive income</b>					
Quoted equities	2,284	-	-	-	2,284
Unquoted equities	96,554	26,914	4,277	13	127,758
Managed funds	1,006	-	-	-	1,006
	<b>99,844</b>	<b>26,914</b>	<b>4,277</b>	<b>13</b>	<b>131,048</b>
<b>Total</b>	<b>168,255</b>	<b>36,358</b>	<b>11,098</b>	<b>45</b>	<b>215,756</b>

At the reporting date, the exposure to listed equity securities at fair value was US\$ 10,422 thousand (2019: US\$ 15,829 thousand). A decrease of 10% on the market indices of MENA stock exchanges could have an impact of approximately US\$ 1,042 thousand (2019: US\$ 1,583 thousand) on the income or equity attributable to the Group, depending on whether the decline is significant or prolonged. The majority of the equities in the MENA region are quoted on the Borsa Kuwait.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2020

### 30 RISK MANAGEMENT (continued)

#### d) Liquidity risk (continued)

In order to ensure that the Group can meet its financial obligations as they fall due, there is a close monitoring of its assets / liabilities position. Besides other functions, the Asset-Liability Committee evaluates the statement of financial position both from a liquidity and an interest rate sensitivity point of view. The whole process is aimed at ensuring sufficient liquidity to fund its ongoing business activities and to meet its obligations as they fall due. A diversified funding base has evolved in deposits raised from the interbank market, deposits received from customers and medium term funds raised through syndicated and commodity based murabaha transactions. These, together with the strength of its equity and the asset quality, ensure that funds are made available on competitive rates.

The maturity analysis of assets and liabilities analysed according to when they are expected to be recovered or settled are as follows:

**At 31 December 2020**

	<i>Less than 12 months</i> US\$ 000	<i>Over 12 months</i> US\$ 000	<i>Total</i> US\$ 000

#### e) Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. When controls fail to perform operational risk can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Group has established a board approved framework for operational risk management which comprehensively outlines operational risk appetite for the Bank and provides operational risk management procedures. The Framework is supported by a dedicated operational risk system covering Loss Data Collection, Risk and Control Self Assessment and Key Indicator modules which have been rolled out in the Bank. While, the Group cannot expect to eliminate all operational risks, but through dedicated operational risk framework and by monitoring and responding to potential risks, the Group is able to manage the risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

**31 FAIR VALUE MEASUREMENT**

The Group uses the hierarchy for determining and disclosing the fair value of financial instruments as disclosed in Note 2.

Management has assessed that financial assets comprising of demand and call deposits with banks, placements with banks, and loans and receivables maturing within one year, and financial liabilities comprising of on-demand customer deposits, amounts due to banks and loans payable falling due within one year approximate their carrying values largely due to the short term maturities of these instruments.

The following table provides the fair value measurement hierarchy of the Group's assets and liabilities.

**Quantitative disclosures fair value measurement hierarchy for assets as at 31 December 2020:**

	<i>Fair value measurement using</i>			
	<i>Level 1</i> US\$ 000	<i>Level 2</i> US\$ 000	<i>Level 3</i> US\$ 000	<i>Total</i> US\$ 000

	19,301	2,672	(6,087)	-	15,886
<i>Investments carried at fair value through other comprehensive income</i>					
Equities - unquoted					
	127,758	(3,037)	-	(7,171)	117,550
Managed funds	1,006	-	-	(973)	33
	128,764	(3,037)	-	(8,144)	117,583
Investment properties	102,713	-	(3,997)	-	98,716

**32 CAPITAL ADEQUACY**

The Bank maintains an actively managed capital base to cover risks inherent in the business. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision ("BIS rules/ratios") as adopted by the CBB.

**Capital management**

The primary objectives of the Group's capital management are to ensure that the Group complies with capital requirements of the CBB and that the Group maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholders' value. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, or issue equity securities. No changes were made in the capital management objectives, policies and processes from previous years.

The risk asset ratio calculated in accordance with the capital adequacy guidelines issued by the CBB, for the Group is as follows:

	<b>2020</b> <b>US\$ 000</b>	<b>2019</b> <b>US\$ 000</b>
Capital base:		
Tier 1	160,315	177,943
Tier 2	15,632	15,658
<b>Total capital base (a)</b>	<b>175,947</b>	<b>193,601</b>
Credit risk weighted exposure	861,641	878,011
Market risk weighted exposure	48,138	11,450
Operational risk weighted exposure	97,600	93,188
<b>Total risk weighted exposure (b)</b>	<b>1,007,379</b>	<b>982,649</b>
<b>Capital adequacy (a/b * 100)</b>	<b>17.47%</b>	<b>19.70%</b>
<b>Minimum requirement</b>	<b>12.5%</b>	<b>12.5%</b>

Regulatory capital consists of Tier 1 capital, which comprises share capital, share premium, statutory reserve, general reserve, treasury share reserve, foreign currency reserve, retained earnings and non-controlling interests less goodwill. The other component of regulatory capital is Tier 2 capital, which includes subordinated long term debt and fair value reserves.

**33 TRANSITION FROM LIBOR TO ALTERNATIVE RISK-FREE RATES**

As communicated by the CBB, the London Interbank Offered Rate ("LIBOR") used to price US\$ denominated financial instruments will be replaced by Secured Overnight Financing Rate ("SOFR") or other recognised benchmark rates internationally. While LIBOR is intended to be discontinued after end-2021, a transition to alternative risk-free rates will potentially have legal, technological, accounting and regulatory implications.

The Bank is currently in the process of assessing the impact of such a transition and developing an approach to address arising risks. An initial impact assessment analysis is being submitted to the CBB as of the date of these financial statements that describes the process, timelines and appropriate legal solutions to deal with the transition.

**Impact on hedging relationships**

Interest Rate Benchmark Reform Amendments to IFRS 9, IAS 39 and IFRS 7 include a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform.

As a result of interest rate benchmark reform, there may be uncertainties about the timing and or amount of benchmark-based cash flows of the hedged item or the hedging instrument during the period before the replacement of an existing interest rate benchmark with an alternative risk-free interest rate. These amendments are effective for annual periods beginning on or after 1 January 2020, with early application permitted. The Group is currently assessing the impact of this standard and will apply from the effective date.

**34 REGULATORY RATIOS**

**Liquidity Coverage Ratio ("LCR")**

	<i>31 December 2020</i>	<i>31 December 2019</i>
Solo	86%	148%
Consolidated	386%	409%

**The Net Stable Funding Ratio ("NSFR")**

The Net Stable Funding Ratio ("NSFR") is calculated in accordance with the Liquidity Risk Management Module guidelines, as issued by the CBB and is effective from 1 January 2019. As per the recent CBB circular OG/106/2020 dated 17 March 2020, the limit for NSFR has been reduced from 100% to 80% for a period of six months, to provide support against the impacts of COVID-19. The Group's consolidated NSFR as of 31 December 2020 is 112% (31 December 2019: 118%).

97% of the total available stable funding is made up of the Group's capital base with only 1% comprising of funding which is due to be repaid in 6 months or more.

The Group's Required Stable Funding ("RSF") comprises of 66% assets that have indefinite maturity, 28% that have contractual maturities of less than 6 months, and 6% non-HQLA (High Quality Liquid Assets) assets (after application of risk weights).

	<i>Unweighted values</i>					<i>Total weighted value</i>
	<i>more than 6 months and less than one year</i>				<i>Over one year</i>	
	<i>No specified maturity</i>	<i>Less than 6 months</i>	<i>US\$ 000</i>	<i>US\$ 000</i>	<i>US\$ 000</i>	
<b>Available Stable Funding</b>						
Capital	236,439	-	-	-	227,129	463,568
Secured and unsecured funding	-	43,519	44,000	-	-	22,000
<b>Total available stable funding</b>	<b>236,439</b>	<b>43,519</b>	<b>44,000</b>	<b>227,129</b>	<b>485,568</b>	
<b>Required Stable Funding</b>						
Unencumbered Non-HQLA securities that are not in default and exchange-traded equities in cases where the issuer is not in default	-	-	-	33,097	-	16,548
Loans	-	111,000	-	-	-	16,650
Deposits held at other financial institutions for operational purposes	-	52,486	-	-	-	26,243
All other assets including fixed assets, items deducted from regulatory capital, insurance assets and defaulted securities	374,196	-	-	-	-	374,196
<i>Off-Balance Sheet exposures</i>						
Trade finance-related obligations (including guarantees and letters of credit)	2,074	-	-	-	-	104
<b>Total required stable funding</b>	<b>376,270</b>	<b>163,486</b>	<b>33,097</b>	<b>-</b>	<b>433,741</b>	
<b>NET STABLE FUNDING RATIO</b>						<b>111.9%</b>

United Gulf Bank B.S.C. (c)

---

SUPPLEMENTARY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2020

**(The attached schedules do not form part of the consolidated financial statements)**

**COVID-19 IMPACT**

During the year ended 31 December 2020, there was an outbreak of coronavirus (COVID-19). The existing and anticipated effects of the outbreak on the global economy is expected to continue to evolve. While these developments continue to impact the Bank's operations, the scale and duration of further developments remain uncertain at this stage and could potentially further impact the Bank's financial position, financial performance and cash flows in the future, the extent of which is presently undeterminable. The Group is monitoring the situation closely, and has undertaken various risk minimisation and management practices to limit and minimise the impact on the Group's operations, financial position and performance.

The Group's Board of Directors and management has been monitoring the impact of COVID-19 on the Group's revenues, impact on valuations of assets and impairments, etc. The Group's contingency plans were activated including business continuity, liquidity management etc.

The regulators in various jurisdictions announced several measures to combat the effects of COVID-19 to assist banks in operating with adequate liquidity and in complying with regulatory requirements. These included payment holiday for 6 months to eligible customers, 0% concessionary repo facilities to banks, reduction of cash reserve requirements from 5% to 3%, reduction in liquidity coverage ratio and net stable funds ratio from 100% to 80%, and the modification losses and additional ECL provisions on Stage 1 and Stage 2 exposures to be added back to Tier 1 capital for two years.

Since the Bank does not provide any retail loans to customers within the Kingdom of Bahrain, no modification losses or significant incremental ECL provisions were recorded or are being added back to the Bank's Tier 1 capital for the purpose of calculating capital adequacy ratios.

The Government of the Kingdom of Bahrain has announced various stimulus programmes to support businesses. The Bank received, for certain months, financial assistance in the form of reimbursement of a portion of staff costs and waiver of utility charges during the year ended 31 December 2020 amounting to US\$ 524 thousand. Further, the Government of the State of Kuwait has announced similar programmes to support business by reimbursing portion of the salaries paid to the Kuwaiti employees. As a result, the Bank's subsidiary, KAMCO Invest received reimbursements amounting to US\$ 703 thousand during the year.

**Impact on financial statements**

The following table summarises the impact that COVID-19 has had on different classes of assets for the year ended 31 December 2020:

<b>Impact on:</b>	<b>Net impact on the Group's consolidated Statement of</b>		
	<b>Income Statement</b> <b>US\$ 000</b>	<b>Statement of Financial Position</b> <b>US\$ 000</b>	<b>Other Comprehensive income</b> <b>US\$ 000</b>
Real estate assets	(7,535)	(7,535)	-
Investments at fair value through profit or loss	(15,191)	(15,191)	-
Investments at fair value through other comprehensive income	-	416	416
Investments in associates	(11,905)	(11,905)	-
Loans, receivables and other assets	(5,220)	(5,220)	-
Other impacts	(281)	(281)	-

**COVID-19 IMPACT**

**Going concern**

The Group's management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

This information has not been subject to any review by external auditors.
